COMMENTS: April 24, 2006 – The Executive Committee requests that the recommendation be resubmitted after the following have been considered: The creation of standardized curriculum content across all disciplines; the creation of required student advising across all disciplines to ensure that all students will take this course during their freshman year; why this course is a graduation requirement instead of a freshman requirement; why a required course is graded CR/NC—on what basis is CR/NC granted; what would the procedure be if a student did not take this course during their freshman year; and data that will address how many students dropped this course, how many students enrolled, and how this course has improved retention of students. It is also questioned whether the university is able to staff this course if it becomes a required course and the compensation for those teaching this course.
